

To stay secure, external access to Invesco services and resources is protected by Duo Multifactor Authentication. If you have not been registered with DUO before, you will need to do this in order to use remote access. This guide explain how to register.

1 Contact the Invesco Help Desk to request access via phone or the Technology Support Portal

2 Once your request is fulfilled, you will receive an email containing a link and inviting you to register for DUO MFA Services. Click on the link and select **Start setup**

3 Select the type of device you'd like to enrol. Invesco Recommendation for best experience is a smart phone

4 Select your country of residence from the drop down menu and confirm your mobile phone number

5 Choose your devices operating system and **continue**

6 Install Duo Mobile from your device App Store

7 Activate Duo Mobile by scanning the barcode with the apps built-in barcode scanner. Follow the platform specific instructions for your device

8 Configure Device options (This is optional but Invesco would recommend 'Automatically send this device a Duo Push')

9 You are now ready to use DUO MFA to authenticate to Invesco services and resources remotely!
